AJBAR Imad
Software Engineer

I'm an autonomous and ambitious software engineer, recently graduated with a master's degree in software engineering. My academic career has been successfully completed, and I am now passionate about programming and mastering several languages, including Python, JavaScript, TypeScript, HTML and CSS. My experience also includes familiarity with the Django and Django Rest frameworks for back-end development, and React/Redux for front-end. Driven by a team spirit and insatiable curiosity, I'm constantly on a quest to learn and explore new technologies.
